

# STUDY ABROAD AT VICTORIA

The School's internationally acclaimed tuatara research and recovery programme

The School of Biological Sciences is a leading centre of study and research in a wide range of areas of biology, in particular medical, ecological, marine and genetic research. The School hosts three applied research centres – the Centre for Biodiscovery, the Centre for Biodiversity and Ecological Restoration, and the Centre for Marine Environmental and Economic Research – and has strong links with the on-campus Malaghan Institute of Medical Research and the unique wildlife sanctuary Zealandia – within a short walk from the campus. State-of-the-art facilities include fully-equipped molecular biology, biochemistry and cell biology and proteomics labs, a robotics lab for chemical genetics and a new coastal marine laboratory and research vessel.
